

Omega 3s

for modern pet

**A healthy, sustainable, plant-based
marine Omega 3 ingredient for pet food**

Built for the next generation of pet nutrition, MiAlgaePet® reduces reliance on overexploited oceans while delivering a premium, high quality source of DHA with year-round commercial stability and no seasonal fluctuations. Clean (no heavy metals or microplastics), highly bioavailable, and adaptable across diverse formulations, it enables new levels of precision, performance, and innovation for pet food brands ready to do things differently.

One tonne of MiAlgaePet® contains the equivalent
Omega 3s as 30 tonnes of wild-caught fish

MiAlgaePet

A microalgae rich in marine Omega 3s backed by nutritional science.

MiAlgaePet®, is the flagship product from MiAlgae, made in Scotland. It's a natural microalgae ingredient fermented on food grade by-products from the whisky industry delivering the same essential nutrients as wild fish, whilst remaining entirely plant-based.

MiAlgaePet® delivers health benefits essential to animal well-being including support for cognitive function, joint, skin, coat and heart health.

At a glance

- Multiple health benefits for pets
- Safe, palatable, digestible and easily absorbed
- Consistent high levels of DHA
- Stable ingredient for vet nutrition
- Grown using food grade whisky by-products
- Low carbon pawprint
- Made in Scotland and EU approved
